1984 Falcon 50 SN 50-085 N107CV

The Dassault Falcon 50 is a super-midsize, long-range business jet produced by Dassault Aviation in France. The first prototype took flight on November 7, 1976, and the jet received French airworthiness certification on February 27, 1979, followed by U.S. FAA certification on March 7, 1979.

The Falcon 50 was the world's first civil aircraft to feature supercritical wings. Its range and payload capacity remain impressive even today, capable of carrying eight passengers 3,020 miles (2,625 nautical miles) at a speed of Mach 0.80. The Falcon 50's versatility, capability for short-field landings, and over 3,200 nautical mile range made it one of the most successful production series aircraft ever developed.

Performance

Max Speed..... 570 kts.
Max Range..... 3,150 nm
Balanced Field Length 4,700 ft.
Landing Field Length... 2,900 ft.
Max Cruise Altitude..... 45,000 ft.
