SERIAL NUMBER 235

EBROCHURE

BEST OF BOTH WORLDS

Exceptional Comfort At An Incredible Value

The G200 has a maximum range of 3400 NM with IFR reserves. For most domestic U.S. trips, the fuel efficient G200 needs only 5,000 feet to takeoff and fly from Los Angeles to New York with eight passengers aboard. Two Pratt and Whitney 306A engines produce enviable range and speed, while keeping fuel consumption low. Normal cruise is 447 kts., burning just 1,800 lbs/268 gals of fuel per hour. The auxiliary power unit - for ground cooling, ground heating and engine start - is a reliable Honeywell GTC36-150.

The 24.5 foot long cabin is light and airy with enough personal space for work or rest. At 6'2" inches, the G200 cabin has more headroom than a GIV, and only 2 inches less floor width. Twelve panoramic windows infuse the cabin with natural light. Baggage space simply is not an issue in the G200 boasting an externally-accessed baggage bay providing a significant 150 cubic feet of storage.
