A detailed view of the cockpit interior of a 2022 Phenom 300E aircraft. The central focus is the Garmin G3000 Prodigy Touch Avionics system, which consists of three large primary flight displays (PFDs) and three multi-function displays (MFDs). The PFDs show various flight parameters including attitude, altitude, airspeed, and engine gauges. The MFDs display maps, traffic, and other flight data. Below the displays are two yokes with integrated controls. The instrument panel is densely packed with buttons and switches, including a central console with a flap lever. The overall design is modern and professional, typical of a high-end business jet.
