

2012 GULFSTREAM G200
SERIAL NUMBER 250

EBROCHURE

BEST OF BOTH WORLDS

Exceptional Comfort At An Incredible Value

The G200 has a maximum range of 3400 NM with IFR reserves. For most domestic U.S. trips, the fuel efficient G200 needs only 5,000 feet to takeoff and fly from Los Angeles to New York with eight passengers aboard. Two Pratt and Whitney 306A engines produce enviable range and speed, while keeping fuel consumption low. Normal cruise is 447 kts., burning just 1,800 lbs/268 gals of fuel per hour. The auxiliary power unit - for ground cooling, ground heating and engine start - is a reliable Honeywell GTCP36-150.

The 24.5 foot long cabin is light and airy with enough personal space for work or rest. At 6'2" inches, the G200 cabin has more headroom than a GIV, and only 2 inches less floor width. Twelve panoramic windows infuse the cabin with natural light. Baggage space simply is not an issue in the G200 boasting an externally-accessed baggage bay providing a significant 150 cubic feet of storage.

The image shows the interior of a Gulfstream G200 aircraft. The cabin is spacious with a high ceiling and large oval windows. On the left, there is a long, plush sofa with a brown and tan striped pattern. On the right, there are several white leather seats with horizontal stitching. The floor is covered in a brown carpet. In the background, the cockpit area is visible with a small screen displaying a map. The overall atmosphere is one of luxury and comfort.
