1977 ANTONOV | AN-2

Aircraft Bidder is excited to bring to market a great example of an Antonov AN-2. Built in 1977, a legendary and rugged utility biplane, with just 1,755 hours since Capital Reconditioning Repair (Major overhaul) and 6,664 total hours since new. With only 89 engine hours since overhaul and 546 propeller hours, this aircraft offers outstanding reliability and capability with 744 hours remaining to next major service. An exceptional example of this iconic short take-off and landing (STOL) workhorse ready for bush flying, skydiving, cargo, adventure or utility operations.

This aircraft comes with the chemicals barrel, as shown in the photos, but can be removed. Maintained by a single owner for 30+ years, and seller will include six weeks of free storage post-closing.

Aircraft Bidder has not performed a Bulgarian Title Search on this aircraft, and will need to be performed by Purchaser, if desired. We do have a declaration signed by the owner declaring that the aircraft is being sold with a clear title. Please see link to aircraft records for a copy of the signed declaration.
