## 2000 CIRRUS SR20

N208CD presents a nice opportunity to get into a GI SR20 with a very low-time motor and Service Center Pedigree. Enjoy the peace of mind that CAPS is due in September 2031 and a recent engine & propeller overhaul in October 2022 provides for minimal scheduled maintenance due in the near future! A fully IFR-capable SR20 with an upgraded Aspen PFD, Dual WAAS Garmin 430's, and an STEC 55X autopilot allow for all types of flying. You'll also have an upgraded GMA 345 Audio Panel and ADS-B In/Out with an upgraded GTX 345 Transponder. The last owner two owners of N208CD used the airplane purely for personal use to get around the center of the country, primarily being based in North Carolina. The aircraft now resides in Ohio where it has been flown by professional pilots at Lone Mountain.
