GULFSTREAM G200

Presenting this stellar 2002 Gulfstream G200, meticulously maintained by a premier management company, ensuring reliability and peak performance. This midsize jet offers truly remarkable cabin comfort at an equally comfortable purchase price and operating expense. Very few aircraft can operate coast-to-coast at these economics, making the G200 an impressive value. Review of this plane's logbooks reveals a well cared for aircraft whose current owner spared no expense including recent Gogo L3 Wifi installation, all backed by the Gulfstream name. Don't miss the chance to own a an aircraft that's as equipped for business as it is for leisure.
