2004 COLUMBIA 350 (N65035) S/N 42052

S P E C S H E E T

Lone Mountain Aircraft is pleased to offer N65035 to the market. N65035 is a wonderful example of a well cared for 2004 Columbia 350. Built in Bend, OR for strength, speed and efficiency the Columbia helped redefine the piston single category. All composite with Carbon Fiber throughout, the Columbia is certified to the Utility Category giving you the comfort of knowing it was built tough. A powerful Continental IO550 is out front with 310hp that is designed to run ROP and LOP giving you the option! Just under 100gallons of usable fuel allows for very long-range cruising or the ability to tanker fuel between destinations! And don't forget the speed brakes to help slow this sleek aircraft down! On the inside you will find a very comfortable four place interior dressed in Tan Leather with Jet Shades to help keep you cool in the summer. The Avionics have been upgraded along the way and now sport the Avidyne EX500 PFD & MFD with Garmin GTN650 & GNS430 WAAS drivers all tied together with the Stec 55X Autopilot. Don't miss the opportunity to fly fast, far and safe with N65035! Contact Lone Mountain for additional high-res photos, condition video and scanned logbooks.
