# STAND UP COMFORT WITH COAST-TO-COAST RANGE

The Raytheon Hawker 850XP, introduced in 2006, is part of a long, proud lineage originating in Britain in the early 1960's - the very dawn of corporate jets.

The transcontinental range 850XP, the sixth generation Hawker business jet, is a mainstay in the fleet due its reliability, cabin accommodation and performance over a wide array of flight profiles. The 850XP's power, range and climb performance is blended with a payload hard to match in other medium-size jets. The addition of winglets increases climb and range performance over the previous model - the Hawker 800XP.

The cabin, with a total volume of 604 cu ft, is highlighted by a 5.7' high center aisle and large, supple chairs, generous sized working tables and a forward galley with ample storage. Sea level takeoff distance at gross weight is 5000 feet; average landing distances are about 2,300 feet; the airplane normally cruises at 447 knots (.76 Mach). Fuel burn averages 250-270 gallons per hour. Maximum Operating Altitude is 41,000 feet.
